

Press Release

New CC Class Fuse Holders with Rejection Feature Now Available from ITC

Date: November, 2005

Details: ITC complements its line of DIN rail mount modular fuse holders with a new model featuring a rejection device that only accepts CC fuses. The new models are CSA and UL approved for 600V, 30A and are available from stock in 1, 2, 3 and 4 poles, with or without a neon indicator. New ganging accessories for the fuse holders are also available from stock and enable the creation of any number of poles, increasing flexibility and reducing stock requirements. Contact ITC for further information.

Look for the following part numbers:

Single pole, non indicating model..... part No. 400.201
 2-pole, non indicating model..... part No. 400.202
 3-pole, non indicating model..... part No. 400.203
 Single pole, indicating model..... part No. 400.211
 2-pole, indicating model..... part No. 400.212
 3-pole, indicating model..... part No. 400.213
 Single pole CC-type, non indicating model..... part No. 400.501
 2-pole CC-type, non indicating model..... part No. 400.502
 3-pole CC-type, non indicating model..... part No. 400.503
 Single pole CC-type, indicating model..... part No. 400.511
 2-pole CC-type, indicating model..... part No. 400.512
 3-pole CC-type, indicating model..... part No. 400.513
 ganging pin, body Part No. 400.095
