

NEW PRODUCT RELEASE

Toronto, April 2008

24V Indicators now Available for DF Series Fuse Holders

ITC's popular line of DF series touch proof fuse holders now includes a midget fuse model with a blown fuse LED indicator designed to operate between 24Vdc and 48Vdc. Bearing approvals from CSA and UL, these fuse holders are available from stock for immediate delivery.

This adds to ITC's comprehensive line of Dead Front fuse holders that includes versions for Midget fuses, rejection versions for CC fuses, both of which are available with or without Neon and LED blown fuse indication.

Contact ITC for a data sheet covering these new product offerings.
