22.5mm Control Devices

▪ Pushbutons ▪ Operators
▪ Selector Switches ▪ E-Stops
▪ Illuminated / Non-Illuminated
▪ Metal / Plastic ▪ Accessories
▪ Pilot Lights ▪ Indicators
▪ Enclosures

c UL us LISTED

The traditional line of 22.5mm diameter control devices (pushbuttons, selector switches and pilot lights) from ITC is designed to provide safe operation and offer easy assembly.

Features:

- Reduced footprint on the panel surface
- Self-cleaning contacts
- Intrinsic grounding of the actuator metal parts
- Excellent flammability ratings
- Shrouded terminals
- Robust construction

A **non-illuminated** device includes an actuator, a mounting collar (or bracket), and a number of NO or NC contacts (1 to a maximum of 6).
An **illuminated** device includes an actuator, a collar equipped with a bulb holder (some models come with a light bulb), and a number of NO or NC contacts (1 to maximum of 4).

Actuators have chrome plated metal bezels (RB2-…) or plastic bezels (RP2-…). Pre-assembled actuators/collars (brackets) are also available. All devices described in this catalog can be mounted on metal plates 1 to 6mm thick. Bulb holders accept BA9s (bayonet) bulbs, voltages up to 220V, with bulb diameter maximum 10mm and maximum length 28mm. Contacts are double-break type, with self-wiping design. Gold plated contacts for low-voltage applications are also available. Contact elements and bulb holders have shrouded terminals with combined (slot/Philips) screw heads.

Mounting
Minimum distance between centers of adjacent devices is 30x40mm. However, the actual layout should be defined based on the application and the type of device used (e.g. a 60mm diameter E-stop requires greater distance between centres). Actuators and pilot light heads mount on the collar (bracket) with a twist-lock-type fixing requiring no tools. The complete assembly locks into position on the panel by means of two pointed screws (M4) tightened from the rear.

Pushbuttons, Selectors and Pilot Lights

Features and specifications of Pushbuttons, Selectors and Pilot Lights:

- **Mechanical life:** 1,000,000 operations (pushbuttons, selectors) - 300,000 operations (E-stops)
- **Frequency of operation maximum:** 3,600 operations/hour
- **Contact Operation:** Slow break, self-wiping (NO or NC). NC with positive opening operation
- **Rated thermal current:** 10A
- **Rated insulation voltage:** 500V
- **Terminal capacity:** Minimum 1 x 0.5mm^2, maximum 2 x 1.5mm^2 or 1 x 2.5mm^2
- **Contact marking: NC:** 1-2 **NO:** 3-4
- **Contact Electrical Rating: AC15:** 24V/4A - 120V/3A - 220V/2A; **DC13:** 24V/0.5A - 110V/0.2A
- **Operating temperature:** -25 to 70°C
- **Ingress protection:** IP65 as per IEC529, NEMA 4X / 12 as per UL50
- **Standards:** CSA C22-2 No. 14-95, UL508, EN60947 -5/1/2000, VDE 0660 (front side)
- **Approvals:** cULus, cCSAus, CE

Palm-Type and Wobble-Type E-stop Buttons

ITC's large-size Emergency-Stop (E-Stop or "Mushroom") pushbuttons, integrate the wide offering of 22.5mm control devices. The diameter of these buttons is 90mm (approx. 3½") which makes them appropriate for applications such as machine tool control, robotics, conveyors, elevating systems, and anywhere an immediate, highly visible emergency intervention device may be required.

Two types are available:

Wobble-Type buttons feature momentary or spring action, and the particularity is that such devices can be operated by applying eccentric pressure to any side of the "Mushroom". A special plastic mounting bracket is included. Available in Red, Green or Black.

Palm-Type buttons feature "push to actuate/pull to reset" function; they are available in Red only and mount on a machine or a panel by means of a standard metal bracket (RB2-B bracket shown on page 10). Standard NO or NC contacts are mounted on such brackets.

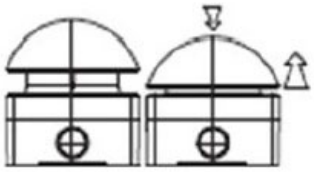

Features and specifications:

- **Mechanical life**: 300,000 operations
- **Mounting hole diameter**: 22.5mm, maximum thickness of plate 2mm
- **IP rating**: IP65
- **Material**: plastic rated UL94-V2

LED Illumination Blub Holders

RB2-BWL7x Series

RB2-BWL7x bulb holders combine built-in LED bulbs with mechanical transmission that transfer operator movement to rear-mounted contact blocks. Use these blocks for pilots light heads and illuminated control devices (pushbuttons, selectors and e-stops).

Select the required LED colour and rated voltage from the table below. Contact blocks are not included.

Monoblock LED Indicator Lights and Buzzers

ITC's Monoblock indicator lights and sound alarms (buzzers) for mounting in 22.5mm panel cutouts combine the convenience of single-component (no separate parts to order or to install) with the long life, low power consumption, high visibility of modern LEDs.

Buzzers have very small footprint, include a luminous red LED indicator and aesthetically combine with other 22.5mm panel components. Connection is by screw terminal. 6V, 36V, 48V and 380VAC are only available upon request.

Features and specifications:

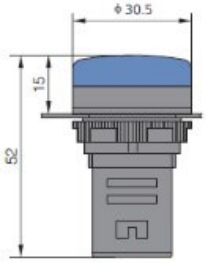

- **Relative humidity**: Maximum 85%
- **Rated current**: Maximum 20 mA
- **Operational life**: > 30,000 hours
- **Brightness at rated voltage**: LED indicators > 60 cd/m^2
- **Loudness (Buzzers):** >70 dB/10cm
- **Maximum voltage**: +10% of rated voltage (AC)
- **Minimum operating voltage**: -15% of rated voltage (AC)
- **Rated wire**: 0.5 to 2.5mm^2 (22 to 14AWG)
- **Terminal screw maximum torque**: 0.8 Nm
- **Operating temperature**: -5 to 40 °C
- **IP rating**: LED indicators IP65 | Buzzers IP20

Rectangular Legend plates

These 40x30mm aluminum legend plates (black, silver or white engraving) are mounted directly under the bezel of a pushbutton or selector switch (metal or plastic). They are clearly visible and can be cleaned or washed without removing the paint or the engraving.

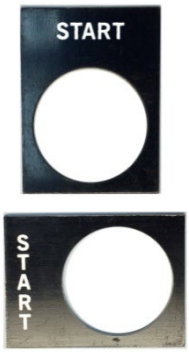

Engraving is horizontal, on top of the round hole.

Standard text is in English, upper case.

Pushbutton Enclosures Type DS-PG – 22.5mm or 30mm

Features and specifications:

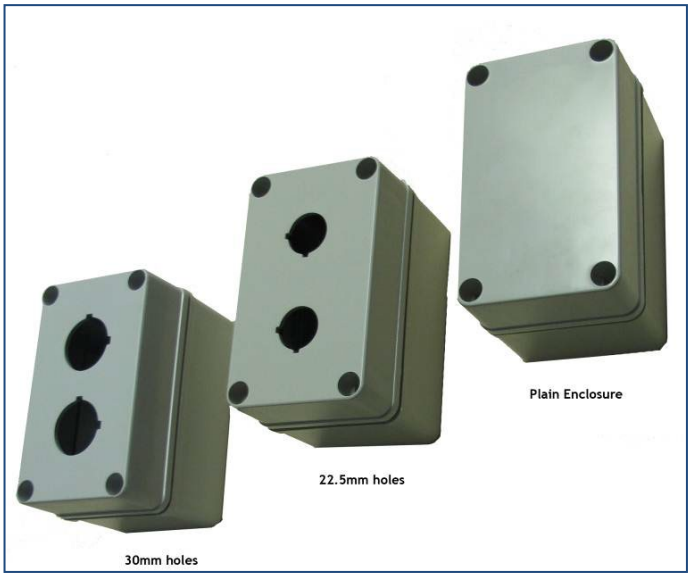

- Available with either 22.5mm or 30mm holes (also available plain, without push-button holes), suitable for all types of control devices
- Available with one, two, three or four in-line holes. All models have the same width and depth
- Depth of enclosures allow for assembly of 2 rows of contacts, depending on the type of device installed
- Water resistant. Cover seal is molded inside a groove in the same
- **Flame resistance:** UL94-5VA
- **Operating temperature:** -40 to 85° C; max 90° C
- **IP rating:** IP66 (IEC 529), NEMA 4X
- **Materials PG:** polycarbonate/ABS (PG); **Materials PCG**: reinforced polyester, suitable for outdoor use
- **Approvals:** cULus

Non-Metallic Economy Pushbutton Enclosures Type RC-P - 22.5mm

These enclosures were designed for compact, quick installation of 22.5mm devices, each with one or maximum 2 contacts.

Features and specifications:

- Available with one, two or three in-line holes, Ø 22.5mm
- Up to 2 contacts per pushbutton can be mounted with a standard collar, or alternately reverse-mounted on the base of the enclosure
- Each enclosure comes with two M20 threaded entries, one being equipped with a protection plug
- Spacing between centers of holes = 50mm allows for easy assembly of pushbuttons, selectors and e-stops
- **Operating temperature:** -25 to 70° C
- **IP rating:** IP65
- **Material:** thermoplastic resin, black base & light grey lid

Aluminum Pushbutton Enclosures Type RC-MT – 22.5mm

Features and specifications:

- Available with one, two, three or four in-line holes, ∅ 22.5mm (standard for pushbuttons, pilot lights, etc.)
- Up to 2 contacts per pushbutton can be mounted with a standard collar, or alternately reverse-mounted on the base of the enclosure
- Spacing between centers of holes = 50mm allows for easy assembly of pushbuttons, selectors, e-stops
- Each enclosure comes with two M20 threaded entries, one being equipped with a protection plug
- Mounting through 4 holes 6mm diameter
- **IP rating**: IP65
- **Material**: die-cast aluminum, protected with powder coating (black base/light grey). High resistance to corrosion
