Reversing Switches

ITC now offers a line of ‘Reversing’ switches for three-phase AC motors, manufactured in Germany by Sontheimer GmBH.

As the name suggests, these switches are used to reverse the direction of rotation in small 3-phase electric motors. Note that these devices cannot be used for controlling single-phase AC motors.

These switches are offered in 2 sizes:

- **Size 8**, rated (UL, CSA) 16A, 600VAC
- **Size 32**, rated (UL, CSA) 40A, 600VAC

These switches are offered in 2 versions:

- Maintained position
- Non-maintained position (spring returns handle back to centre position)

Three types of mounting can be selected:

- Type E, door mount, 4+1 holes (IP54, IP65 with accessory Z1/D1)
- Type ZM, door mount, single hole Ф22.5mm (IP65)
- Type PM-D1, in plastic enclosure CSA/UL certified (IP 65- Nema 4x)

These switches are built in accordance with all applicable international Standards and are certified by UL and CSA for the North American market, and are economical, compact in size, simple to install, wire and operate.

**Features and specifications:**

- Standard front plate: Silver with black marking 1-0-2
  (plate marked “Reverse-0-Forward” is available upon request)
- Ingress protection: see above
- Rated wire sections: 14-8 AWG (2.5-10mm²)
- Temperature range: -20 to 50°C
- Approvals: CSA, cULus, CE-mark, RoHS compliant
- Accessories available:
  - Different types of handles, including padlockable models
  - IP65 kit (for type E)
  - Custom front plates
  - Protection housing for switch body (door-mount types)
  - Additional plate identification tag
  - Custom enclosures
