

GREAT DEAL on Fuse Holders for PCB!

ITC offers their inventory of Fuse Holders for printed circuit boards with discounts up to 53%!

Fuse holders for 5x20mm glass fuses ("GMA"), for mounting on printed circuit boards

Features:

- Small footprint: overall length 24.2 mm (~1"), width 9mm (~3/8") and height 12 mm (~ 1/2")
- Easy replacement of the fuse, without tools
- Accept any 5x50mm ("GMA") glass or ceramic fuse
- **Materials:** halogen-free, self-extinguishing polyamide
- Contacts of brass, tin plated
- Available in 2 different body forms (plastic mounting pin or mounting hole)
- Available in black (standard), white or red upon request
- Optional cover mounts on the body of the fuse, and can be used to remove or insert the fuse in the holder
- Two pin spacings available: 15mm and 22.5mm
- Pin size: 1.2mm

Models with 1 pin represented above
